

Are you still using high pH chemicals for the exterior cleaning of rolling stock?

High pH chemicals often verge on being classed as 'Caustic Based' which is acceptable for unblocking drains but you wouldn't use a drain cleaner for cleaning rolling stock would you?

Chemicals with a high pH will give you the following:

- Dull Paintwork
- Discharge to Drain issues
- Risk of Chemical Burns to staff

Gard Chemicals are a UK based manufacturer of bespoke formulations for the Rail Industry, and leading the range is our unique Gard RSC - pH Neutral Cleaner for Rolling Stock

Gard RSC will give you the following benefits:

- Longevity of paint / finishes
- Maintains consent to discharge limits
- High dilution rate
- Safety in use
- CWM or Manual Application
- Approved by numerous manufacturers
- Supplied extensively to TOC's
